

Canton Township Board of Trustees, fire and zoning departments would like to thank Mr. Steve Gregory for inviting us, along with Canton Local Schools Superintendent Steve Milano, for a tour of Gregory Galvanizing. It was a very informative tour with a brief meeting afterwards with all sides discussing how we may all work cooperatively to benefit the community, business, safety and the local schools.

Gregory's was founded in 1896 by Thomas Gregory in Brooklyn, NY, today Gregory Industries is regarded as a leader in the continuous galvanized metal coatings service. Some of the products they produce are:

- Highway Safety Guardrail Systems
- High Tension Cable Barriers
- Expanded Metal Fence Systems- Posts and Framing
- Strut Systems and Accessories for various mounting projects

It was pleasure getting to know more about Gregory's products and processes, while also assisting them with safety ideas, as they are very proactive in providing a safe work environment and producing industry leading quality products.
